**Project Description/Justification:**

This request is for receipt authority to receive funding from the Environmental Protection Agency (EPA) for bulk fuel projects. Approximately \$100 million in funding to the Denali Commission is being directed to ANTHC for distribution equally to both the AEA and to Alaska Village Electric Co-op. Each agency will use funds to build bulk fuel facilities in communities that are on the priority list. The AEA expects to complete two to five projects. The bulk fuel tank farm program upgrades aging tanks that may be leaking, add capacity to meet community needs and meet code compliance standards improving life, health, and safety in communities. The total funding received will be over \$50 million.
